

LEAVE MORE SPACE FOR TRUCKS

Allow semi-trucks plenty of room.
Be careful when you or the semi-truck are entering a highway or merging with traffic.

Don't tailgate.
Unlike cars, semi-trucks have big blind spots behind them. Also, car drivers who tailgate semi-trucks can't see traffic ahead. If the semi-truck brakes suddenly, you have no time to react and no place to go.

Don't cut off semi-trucks.
For safety, one car length for every 10 miles per hour of speed is recommended.
